

in the objection statements, it is seen that in several instances works have been started on account of urgency or other special circumstances in anticipation of sanctioned estimates under orders of competent authority and that estimates, original or revised, are awaiting sanction. It is now proposed under orders of Government in the Financial Department to show expenditure on such items separately as distinct from expenditure incurred by the Executive Engineers (without estimates or in excess of estimates) on their own responsibility without the approval of the competent superior controlling authority. A clear distinction is required to be made by this office between objections for which the Executive Engineers are personally responsible and those which should not be booked against them personally.

2. To give effect to the orders of Government the following procedure will be followed in the preparation of the monthly statements of objectionable items.

(a) The columns 'Want of estimate' and 'Excess over estimate' will be sub-divided into (a) 'Want of estimate or Excess over estimate for which the Executive Engineers are personally responsible' and (b) 'Want of estimate or Excess over estimate for which the Executive Engineers are not personally responsible.'

3. Under para 81, P. W. Account Code, the Executive Engineers are required to communicate to this office all orders authorising them to start works for which estimates have not been sanctioned and where regular estimates have not been got up and submitted for sanction. Further, copies of Preliminary Estimates are also required to be sent to this office in accordance with para 4 (3) of G. O. No. Fl. 708-80—G. F. 288-38-13, dated 7-8th August 1939, passing orders on the Report of the Public Accounts Committee for the year 1937-38. In the accounts of the month in which expenditure is incurred for the first time, reference to the orders authorising the execution of works as also reference to the Executive Engineer's letter forwarding the copy of the preliminary estimates should be clearly and distinctly noted on the face of the relevant schedule dockets. Expenditure on such works will be shown separately in the Monthly Objectionable Items Statements as amounts placed under objection for which the Executive Engineers are not personally responsible.

4. This sub-division of classification of objectionable expenditure does not, in any manner, absolve the Executive Engineers from taking necessary action to regularise the expenditure by obtaining the requisite sanctions as speedily as possible.

5. The above procedure will come into force commencing with the accounts for January 1941.

M. VIRARAJA URS,
